Subject: Bee Bots

Good Afternoon!

Just wanted to send you a few photos of Lincoln School students starting to utilize the Bee Bots Robots. After having spent several weeks performing computer coding on the Internet, they were able to apply this knowledge directly to the programming of the Bees. It was amazing to see their inquiry and problem solving skills as they approached this task. The students had a fantastic time and came up with a variety of tasks that the Bees can do! They also brainstormed ways in which they, the older students, can teach the younger students to program the Bees.

I for one am looking forward to continuing to use this program throughout the Lincoln School population.

Thank you!
